

Big Chautauqua Week Attraction

THE BEN GREET PLAYERS

ONE of the greatest events on the forthcoming Chautauqua program this season will be the coming of the Ben Greet Players. A company of thirteen players, personally trained and coached by Ben Greet, are to appear here.

Mr. Greet is considered today one of the greatest living authorities on the English drama and is world famous for his remarkable productions of Shakespearean plays and old English comedies. He has been connected with the stage for thirty years and has taught many actors, perhaps more than any other man living today.

For twenty years Mr. Greet has been prominent in England for performances in which his splendid companies have acted each year in London, Cambridge, Stratford on Avon and other places in "Shakespeare's England."

Mr. Greet became well known in America several years ago through his presentation of the morality play "Everyman" under the management of Charles Frohman. This was the first time a play was presented in America by a professional company in the Elizabethan manner. This was later followed by a production of Shakespearean plays and classical comedies.

The company of thirteen Ben Greet Players who are to appear on the Chautauqua program here is the same company which made a transcontinental tour under Redpath management during the winter '12 past, playing to large crowds and mostly in the cities.

They will present "The Comedy of Errors" here, one of the best and most interesting of Shakespeare's productions. Special costumes will be worn in this production.

NO HALOS AROUND CABINET MEN.

It is a curious and interesting fact that while a cabinet may collectively make or mar an administration by its weakness or strength, the position of cabinet officer has never seemed to possess much political advantage for the individual. There is hardly one ex-cabinet officer in the United States today with a halo still around his head. Few men can now name off-hand the cabinet officers of the last administration. Not one man in ten can remember accurately the names of McKinley's advisers. To go still further into the past is to mingle with shadowy and ghost-like phantoms. There was a period, long ago, when the secretary of state was deemed the logical successor of the president. That time has passed. Nowadays a cabinet position seems to be the most effectual quietus for political ambition.—Washington (D. C.) Herald.

OUR SENTIMENTS

Do Your Own "Roasting"

Every once in a while some one intimates that we ought to "rip some one up the back"—say they deserve it and they don't see why we don't do it. Friends, we are not in the roasting business. Apply at a crematory if you have it in for some one. Go to him like a man. Don't try to mix the printers up into your grievances. They have troubles of their own. None of us poor mortals here below are perfect, not by a long shot, and other people may think that you yourself deserve special attention.—Herald Enterprise.

BECKHAM DECLINES TO MEET STANLEY

Frankfort, Ky., May 15.—Former Governor J. C. W. Beckham today declined Congressman A. O. Stanley's challenge to a joint debate at Glasgow in the following letter:

"To Hon. A. O. Stanley, M. C. Washington, D. C.—Dear Sir: Replying to your recent letter offering me a division of time when you speak in Glasgow on May 19, I respectfully decline your invitation. Yours very truly,

J. C. W. BECKHAM

Youth Dragged to Death Under Disc Harrow.

Danville, Ill., May 20.—French Close, 19, of Owensburg, Ind., was dragged to death under a disc harrow when a four-mile team became frightened and ran away. The body was dragged a quarter of a mile and terribly mutilated. No one saw the accident, but the absence of the team from the field caused a search to be made. The body was found under the harrow and the mules were huddled in one corner of the field.

OYSTER-SHELL CONCRETE

Galveston people have put up a five-story concrete building, the concrete being made of oyster shells from the reefs of Galveston Bay. This material is asserted to be better and cheaper than concrete made of gravel. Shell concrete built in a wall three feet high and 336 feet long, in 1822, withstood the severe test of fire and water, and is today as sound as when built. It is estimated that the shells of 5,896,000 oysters are imbedded in the wall of this building.—Ex.
